Prescriber (EHR)

Pharmacist (Pharmacy)

Prescriber (EHR)

Pharmacist (Pharmacy)

Fill Status
(RXFILL)

Pharmacist to notify the Prescriber about the status of a prescription in three cases:
1) to notify the Prescriber of a dispensed prescription,
2) to notify the Prescriber of a partially dispensed prescription, and
3) to notify a Prescriber of a prescription not dispensed.

Lets Prescriber know whether a patient has picked up a prescription, and if so, whether in full or in part. This information can inform assessments of medication adherence.

Status

Status is a successful message receipt

Status

Medication History
(RXHREQ, RXHRES)

Prescriber generates a patient-specific medication history request.

The Pharmacy responds with a patient's medication history, including source, fill number, follow-up contact, date range..
