

Title
Death at Home

Description
After Madeline's death was reported to the national statistical agency either via an A04 message (if Tester is using HL7 V2.6) or C-CDA from the EHR, the funeral director realizes that he incorrectly entered Madeline's level of education in the jurisdictional EDRS.  He corrects the decedent's level of education in the EDRS and sets the education edit flag in the EDRS to indicate that the decedent's education level has been verified. The updated record for Madeline Smith is transmitted either via an ADT^A08 message (if Tester is using HL7 V2.6) or C-CDA from the EDRS to the national statistical agency.
